Minimum Chemical Use**

ECO

Dipper™

DIP WASTAGE

Why are you letting valuable teat dip drip onto the floor?

It's wasteful and not very efficient....

Your valuable teat dip should go on the teat.....

ECO-Dipper™ special brushes wipe on - thus ensuring complete teat coverage and then safely wipe off excess chemical back into the cup!

Wasted teat dip on the parlour floor

HOW MUCH MONEY ARE YOU LOSING?

If you are not using the Eco-Dipper™ Dip Cup to save at least 50% of your chemical.

This is how much money you are losing even based on a basic formulation at around £1 a litre!

Obviously with higher value dips you can save a lot more!

50 cows 2 x day milking = £25 loss every 50 days = £182 a year
100 cows 2 x day milking = £25 loss every 25 days = £365 a year
250 cows 2 x day milking = £25 loss every 10 days = £912 a year
500 cows 2 x day milking = £25 loss every 5 days = £1825 a year

FACT: If you replace your very wasteful teat sprayer with an ECO-Dipper™ you can easily multiply savings by another 5 times. Not only will you get better teat coverage but on a herd of 100 cows could save a massive £1825 a year!

AWARD WINNING FEATURES

- Uses less than 50% of the chemical of a normal dip cup
- Special leather brushes gently wipe away excess chemical
- Non return chemical action
- Long lasting - replaceable brushes
- Easily cleaned and serviced
- Easy squeeze, stable bottle
- Lightweight, tough polypropylene construction
- Different coloured brushes for pre and post dip
- Based on original US patent that set the industry standard
- Designed to give long dependable service

THE DIP

SATISFIED USERS

Mr Foote, Church Lane Farm, Hampshire, England

"We have cut our usage of Genus Valiant by around 30-40% using the ECO-Dipper™.

It takes a bit longer than a normal dip cup but the time saved in refilling dip cups evens it out".

WJ Davies, Plasnew, Wales -100 cows

"Very good coverage with thicker chemicals like Uddergold, saves half the chemical and hardly any drips on the floor after milking -

Simple and well worth the money!"

Mr Howlett, Wicton Farm, Herefordshire - 300 cows

"We are saving around half the chemical (50%) and are filling the Dip Cup a lot less often".

Peters Holsteins, Körchow, Mecklenburg-Vorpommern, Germany - milking over 600 cows

"Simply **super** - we save more than 50% of the dip, are extremely satisfied and highly recommend using it!"

Siemers Holsteins, Newton, Wisconsin

"By using ECO-Dippers™ we have cut our dip expense to one-third!

We are very pleased with the dip coverage of these dip cups".

FACT: Guaranteed 50-80% savings in pre- and post-dip usage when using the ECO-Dipper™ over standard dip cups.
