## **Testimonials**

Response from farmers has been very positive and has prompted comments like:

### 'Brilliant!!'

'Every Farmer should have one!'

'Stops us from cutting corners – the countdown timer makes you wait.'

'I did not think I would use the gun warming chamber – but it is handy to set up 3 or 4 guns and have them ready for when we have a line of cows.'

'I can use it anywhere – it's great to be able to plug it into the truck.'

'Just the job for sexed semen – I push a button and it moves 1°C.'

'Nice that we are making stuff in the UK.'

'It's well made. Great features and very handy.'

'This is the best thaw flask we have ever used.'

'This is the future of semen thawing.'

# Digital Semen Superthaw™ Flask

### **Background - The Facts!**

It is very important that bull semen is thawed consistently at the right temperature and for the correct time.

You should always consult your semen supplier as to their actual recommendations:

 Normal and Sexed semen are typically thawed at 35-37°C (95-98°F) for 30-45 seconds.

If this does not take place then a percentage of sperm will die long before they ever see a cow, this has even greater consequences for sexed semen and older straws.

Our new Dairymac Superthaw™ is designed and manufactured in the UK and based on a comprehensive list of 'needs' and ' desires' in our discussions with farmers, AI technicians and vets.

### Dairymac Superthaw<sup>™</sup>

Award winning advanced semen thawing features:

- New Flip Lid option for AI technicians
- Adjustable digital temperature 20-45°C (68-113°F) (99% accuracy) which can be set at correct temperature for normal and sexed semen
- Programmable timer up to 10 mins in 1 second increments
- Removable AI gun warmer chamber and straw basket, keep thawed straws and guns at a stable temperature
- Watertight lid with pressure relief valve
- Fully insulated flask to help retain heat
- Latest low energy use rated electronics
- Supplied with 120-220vdc & 12vdc power supplies
- Highest levels of safety with a thermal cut out switch, pressure relief valve and full CE, UL, cUL certification

The Dairymac *Superthaw*<sup>™</sup> makes it easy to program the correct temperature and time

#### Example: 36°C for 45 seconds

#### Example: 37°C for 40 seconds

#### Prepare several AI guns in batches and use the handy AI gun warmer chamber to save time and reduce stress on waiting cows

Both lids fit all Superthaw units

## Why buy the Dairymac *Superthaw*™?

- Accurate thawing times and temperatures observed for all types of semen
- Robust design for use in the field and harsh environments
- Better quality sperm ensures a higher % of living sperm, increasing herd fertility with fewer returns
- Can also be used in embryo transfer procedures

## Fantastic build quality from a quality UK manufacturer

- Large waterproof LCD digital display
- Thermoplastic case, stainless steel water bath and silicone heater
- Heat retention and multiple power supplies allow easy transport around farm
- 2 year warranty

The Dairymac *Superthaw*™ is an evolution in Al procedure and accurate semen thawing. It puts the latest technology within reach of every dairy farmer at a modest price
